

InterQuest Group is an award-winning consultancy and over the course of the last 16 years, we have supported major government programmes across the public sector and boast an enviable reputation of success.

G-Cloud is a fully EU compliant framework which was launched in 2011 to transform the way that public sector organisations (central government, local government, health, education, devolved administrations, emergency services, defence and not-for-profit) buy cloud based services.

These services are accessed through the Digital Marketplace, an EU compliant framework which is evaluated by the Crown Commercial Service. The latest iteration of G-Cloud (9) went live on the Digital Marketplace in May 2017. More information can be found by visiting www.digitalmarketplace.service.gov.uk

InterQuest Group are proud to offer 19 specialist Cloud Support services on the G Cloud 9 Framework, and we are also proud to offer our innovative and bespoke Contingent Workforce Management Service (CWMS), which is available as Cloud Software for Public Sector buyers on the Digital Marketplace.
